

İSMET SARI

Junior Student

I am currently a junior computer engineering undergraduate student at Boğaziçi University. My only goal is to turn my theoretical knowledge into practice by working for a company that uses the best technologies during my internship. So far, I have designed many projects using many different programming languages, but mostly I have experience in Python, C ++, Ansible, and Java. Besides, I want to make progress in the current programming languages and technologies such as Go and Kubernetes.
